The Arizona Press Association's annual meeting will be held in Globe, May 8 and 9. The press, it is hoped, will be well represented.

According to the Boston Herald the banks of this country hold over \$90,000,000 of public money, as compared with \$16,000,000 on deposit on March 1, 1897, which was rather above than below the average, and yet Secretary Gage hesitates to draw upon this deposit for the purpose of meeting expenditures because of his fear that the market may be tightened. Truly we live in prosperous times and the war tax goes merrily on.

It is to be regretted that the necessities of war have compelled the position taken by the United States in the Philippines. In the recent call for volunteers and the probability that an army of 100,000 men will be sent to the islands, the government is emulating the advice of Polonius to Laertes—
"Beware of entrance to a quarrel, but being in, bear't that the opposed may beware of thee." On this basis the administration will be supported by the people irrespective of politics.

Delegate J. F. Wilson is making a business of learning from the people what they most desire in the matter of congressional aid touching the general interests of the territory. For this purpose he is visiting the different sections of Arizona and personally interviewing the people. The result is he is being received with cordiality and is being posted as to the opinion of his constituents in a way which gives him their best thoughts and suggestions. This is well. It will result in benefit, for Delegate Wilson is a worker and is earnest in his desire to be of the largest possible benefit to all of his constituents, irrespective of party affiliations.—Star.

Considerable complaint has been lately made by the cattle men of Globe county about the department regulations allowing an impounding fee to Indians of fifty cents per head for all cattle found off range and on the San Carlos reservation, the cattle men claiming that this reward places a premium on dishonesty on the part of the Indians. In support of this statement is made by the cattlemen that at their last meeting at San Carlos for the purpose of identifying impounded stock there were many brands which had been more or less gently persuaded to cross the dead line by those who would be the most benefited by the lack of knowledge on the part of the cattle of conventional rules and bounds.

The SILVER BELT joins most earnestly in the general condemnation on the part of the press of this territory of the increasing menace to the mining industry, due to wildest mining schemes which are now being floated throughout the eastern states. The abuse has grown so great that it is almost impossible to pick up a paper published in any of the large eastern cities that does not contain a lengthy advertisement couched in language which, to all except the most glib, would bespeak the swindler pure and simple. Not the least of the harm arising from this practice is the fact that the shares are sold to those who can least afford to lose the money, the present high value of copper affording ample pretext to the "promoters" for offering quick returns on an insignificant outlay, in line with the stock trade argument of the gold brick man. In mining, as in few other forms of speculation, the property shows for itself, and a mining boom, which is dependent upon the smooth talk of a "promoter" whose chief concern is that his victim does not know, or knowing shall not see the mine, is a boom to be avoided. Good copper or gold mines sell themselves, there being abundant capital ready to invest. Fortunately, Globe has not suffered more than the practices mentioned above have caused all mining districts through the lack of confidence which these frauds when exposed engender. This district has the mineral to back statements made, and our mine owners are not only ready but willing and anxious that prospective purchasers should examine properties before investing a dollar.

"Still on Top."

The well known music house of A. Redewill is not satisfied simply to get on the top of the ladder and then stop. Mr. Redewill wants to run the poles up into space and tack on a few more rungs for fear some one will catch up with him. Since last October Mr. Redewill has disposed of 78 pianos and organs and is just now getting ready to take off his coat for the summer trade. He will leave for Sonora in a few days and will "take in" Guaymas and Hermosillo on his travels. He proposes to place a carload of implements in that state and he will probably do it. He believes he has a mission, and it is to civilize the whole southwest through the refining influence of music. By strict business methods and honest dealing he has thus far made great progress along the line of his theory.—Phoenix Herald.

Wm. Ryan has appeared on the streets with an up-to-date milk wagon. Mr. Ryan believes in enterprise in any business.

Henry Armer is in town from Salt River, his business being to locate a Mexican who borrowed a horse from him last week and as yet has failed to return it.

Maurice Belknap is seriously ill at the Kinney House, he is under the constant care of Dr. Collins. His illness is caused by aggravation of an old complaint.

A Calumet, Mich., dispatch says the Tamarrack, Osceola, Tamsack, Jr., and Kearsage copper mines have been compelled to close on account of a strike at their stamping mills at South Lake Linden. About 2500 men are out of work through the strike of 300 men at the mills. The mill men are likely to demand a straight 10 per cent raise before beginning work again.—Los Angeles Mining Review.
